

The Amlib library software is very flexible in many areas, which means we can customise the look and the feel, to include your own department **identity**. There are many other **options** that are available, and our team would gladly spend time discussing them with you.

A Robust Library Management System – scalable from small libraries with 1 librarian, up to larger libraries processing millions of circulation transactions. You can create multiple Web Opac interfaces.

Powerful Web Opac enabling Borrowers to search the catalogue, place reservations and view their loans history simply using the Intranet or Internet. Images can be attached to items to enable viewing over the Internet.

Full onsite **training**, easy to use **How To** documents, which you can be down loaded from our website, as and when you require them.

You receive **Free of charge** library software upgrades as and when released, and overall back up and **support** that is surpassed by no one in this industry.

We provide a Telephone **Help Desk** for instant help and **response**. All our team has the technical **expertise** and use non technical jargon to our customers; this will make the process as easy as possible.

We also have experience with **data conversion** from 20 library systems and 300 libraries. Our team has the technical expertise to help and assist with the implementation and set up procedure.

User Groups to **help** both librarians with their library software, and Amlib, for product and client service development. Amlib **understands** librarians and their work, we are here to help and respond to all your requests.

These are a few of benefits that our library software can bring to your library, if you would like more information or a free on-site demonstration please contact government@amlib.co.uk you will hear back from us within 48 hours or telephone +44(0)1256 300 790

Amlib Library Software: About Us...

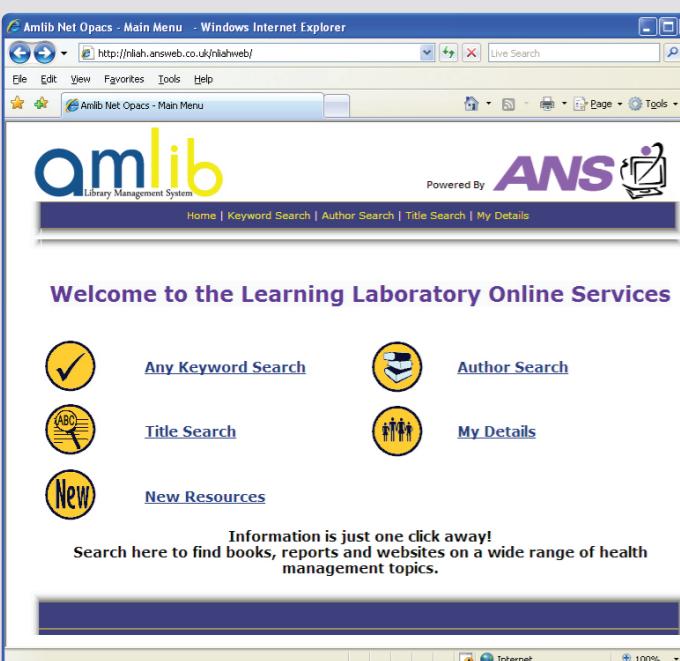

Amlib™ Library Management System provides leading cutting edge technology for libraries around the world. We are committed to developing our library software for the **benefit** of librarians, not software technicians.

We work closely with our users to maintain high levels of user interface and library software that **integrates** with their library, and their library management.

Amlib is part of Applied Network Solutions Ltd which has been developing, supplying and supporting software since 1985; having the backing of ANS with its technical knowledge and **experience** gives Amlib the ability to offer a true total **solutions** library software package.

When purchasing a library management system, dealing with a **straightforward** and truthful company like Amlib, makes the software implementation and the ongoing years of support, a foregone **successful** conclusion. Check out our Library Management System Overview at www.amlib.co.uk

Our client library software support is second to no one; we pride ourselves in providing
